

## SELCO SG - 440 PAG GREASE

**SG-440** is a premium quality multi-purpose polyalkalyne glycol (PAG) base lithium soap grease. It is fortified with other additives to impart corrosion protection and oxidation stability to the product. PAG being exceedingly water repellent, imparts an excellent water resistant quality to this grease. This grease also offers excellent resistance to petroleum products. This product is an excellent anti-friction ball and roller bearing lubricant and performs well in the lubrication of the following types of equipment:

**Any application where lubrication is required in water environment, wheel bearings, electric motor bearings, water pumps, ball joints, track rollers, etc.**

### PROVEN BENEFITS:

- Reduces friction
- Extends bearing life
- Lengthens lubrication intervals
- More energy efficient

### TYPICAL PROPERTIES:

#### TEST METHOD    TYPICAL RESULTS

Appearance	Smooth, Buttery	
Colour	Pale white	
Penetration mm/10	ASTM D 217	
Unworked	280	
Worked 60 strokes	284	
Consistency	2	
Dropping Point	ASTM D 2265	210 deg.C
Pressure Drop after 100 hrs.	Less than 7 psi	
Roll Stability	ASTM D 1831	No Change
