

# **SELCO SG - 640**

## **GEAR GUARD**

### **PRODUCT**

SG-640 is an extremely stable suspension of uniform, microscopic molybdenum disulphide particles in a highly refined petroleum oil concentrate.

### **BENEFITS**

- \* High Lubricity
- \* Great affinity for metal surface
- \* Excellent adhesion
- \* Supports extreme loads
- \* Eliminates galling & seizing
- \* Reduces wear-in time
- \* Prevents fretting
- \* Facilitates disassembly

### **APPLICATIONS**

As an additive SG-640, substantially improves the extreme pressure, anti-wear and anti-friction capabilities of oils and greases and provides reliable lubrication in those demanding applications that approach boundary lubrication conditions.

### **SPECIFICATIONS :**

* Lubricating solid	Molybdenum Di-Sulphide
* Carrier	Petroleum oil
* Diluents	Petroleum oils, Grease
* Viscosity	30 CST 93.9° C
* Solids Content	15 %
* Density	0.996 gms/cc
* Flash Point	196° C
* Colour	Grey / Green
